

# WARMERS/MERCHANDISERS

## For Popcorn or Nacho Chips

These Warmers/Merchandisers are ideal for environments that have very high usage in a short period of time. Each Warmer has a 50 watt warming element in the base to keep pre-popped popcorn or nacho chips warm, fresh and available for peak selling times. The clear lid allows light to shine into the holding compartment while the stainless steel deflection board prevents Popcorn/Nachos from breakage during loading. Decals for both Popcorn and Nachos are included with each machine, allowing the user to customize it to their needs.

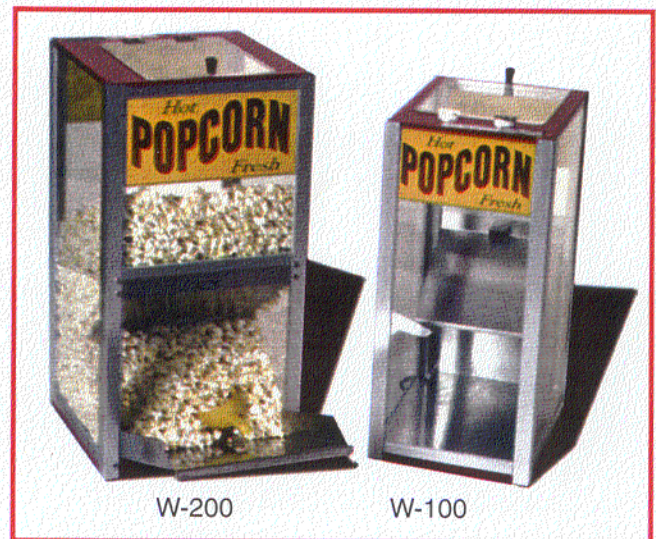

Paragon warmers use tempered glass panels, heavy gauge Plexiglas loading doors, anodized aluminum corner posts, stainless steel base trays and stainless steel drop doors for easy cleaning and years of durability. The lighted rocker switch keeps the user informed of the machine's on/off status.

### IDEAL FOR:

**Arenas, Stadiums, Skating Rinks,  
Concession Stands, Malls and Cafeterias**

### Three-year Warranty Program

Standards: UL - CSA - NSF - CE
